FEATURES

Fully Automated Patch Management
View available updates and install them in bulk on target endpoints. Configure a flexible Windows update policy for computers in your environment.

Web-Based Remote Access to Windows Devices `NEW`
Access Windows devices via a browser without having to install the MSP360 Connect app on your computer. Simply log into the MSP360 web console and connect.

SNMP Monitoring
Scan and list devices on a local network using SNMP V1, SNMP V2, or SNMP V3 protocols.

Software Deployment
Install and uninstall applications on multiple computers in a few clicks.

Scheduled Tasks
Choose whether to run a task immediately or schedule it to run later.

Alerting & Reporting
Monitor the health of your systems with customizable alerts based on system performance. Receive real-time push notifications directly to your mobile device.

Script Library
Simplify automation of business-critical operations through the RMM.

Antivirus Management
Automate scanning and protect your systems from malware while focusing on your main goals.

Wake-on-LAN and Remote Reboot
Wake up and restart remote devices with the click of a button.
